A CLOSER LOOK ONTO THE REASONS FOR ABORTION

BY CHRISTOPHER BENJAMIN

I will start with the following thought given by the Universal Brotherhood of Light (www.Encyclopedia-InitiaticScience.info):

The younger generation believes that sexual liberation has been a great victory. It is true that it has been a great victory against the hypocrisy and narrow-mindedness that has prevailed over the centuries. But has that resolved the problem of sexuality? After suppression comes the release, and with it, the doors open to every possible physical and psychic disorder. Because the problem is not solved by recommending the use of contraceptives or legalizing abortion. And of course forbidding them is not the answer either. It is therefore not a question of sanctioning or prohibiting, but for studying and understanding. The sexual force is thousands of years old. It is impossible to fight it. Human beings must come to understand that methods exist to channel this force, to direct it, so that it may contribute to the psychic, moral and spiritual development of human kind. Having sought and received these explanations, it is up to every individual to think and decide what they want to do.

How do you understand life?

Do you understand it in the way that life is only fun and joy and that everything is allowed as long as you ignore the consequences?

Do you believe that everything you do or not do is without consequences? That nothing follows your actions or non-actions? You know through personal experiences that this is not the case: how often do you ask yourself: Why didn't I do that? ... Why didn't I told him/her? ... Why did I let him/her go? ... Why didn't I master myself better? ... I knew that that will happen!

Or: Why did I do that? ... Why did I say that? ... Why did I accept? ... I knew that it was unfair! ... I knew it was useless! ... I knew that

But when it comes to feelings and pleasure people become very careless! They ignore everything and let themselves go.

Pleasure is almost a law in the modern society, and pleasure is very much associated with sex and sexual relationships which very often last only one night and even not that! How many women and men are proud about that and boast with that!

And what does it instead reveal? ... That they are unable to have a real relationship and are very lonely! They associate sex with love and fall only more deep into the whole of emptiness than they had been before.

Did you see the movie *Autumn in New York* with Richard Gere and Winona Ryer?

There you see exactly such a guy, represented by Richard Gere, who is not able have a real love-affair, to receive and accept real love! But thanks to the confrontation with his stupidity, and becoming conscious of his very deep and profound love to his friend he is able to master himself and ready for a serious relationship! A wonderful example for everyone who thinks he becomes satisfied with one-night-stands. (Read also the scripture *I am single*!)

But is it really pleasure they experience or is it rather pleasure for someone else? Who gains with this life-style?

I give you an excerpt of the book *The Sublime Origin and Goal of Sexuality and the Sexual Force* ('Edition of Eternal Wisdom' with thoughts of great spiritual Teachers of the Universal Brotherhood of Light www.Encyclopedia-InitiaticScience.info) which reveals a reality people today have no idea of:

CHRISTOPHER BENJAMIN – THE REASONS FOR ABORTION

Men and women think that the sexual act concerns only them because they perform it in private. Well, they are mistaken. And people who have been able to keep a clear mind during all the excitement have realized that what they were experiencing produced emanations that served to feed entities of the astral world. These entities are so greedy that they were obliged to let them feed themselves at their expense, which meant that they lost a great deal of precious energies. But since they are not capable of analyzing themselves, all these ignoramuses shout: 'Ah, that was pure ecstasy!', when in fact other entities were enjoying themselves through them. So long as people continue to live a life based on passions and instincts, they will be robbed by these lower creatures. If they live a life of true love, however, they will become stronger, more beautiful and they, not the others, will be the true winners.

This is enough about this behavior with sex and fun in modern society.

I would like to talk about other perspectives which I often miss in common conversations. There are several points I would like to present now:

- 1) There exists a general misunderstanding of the sexual act itself!
- 2) People, couples don't know what it means to get a baby and also to have children.
- 3) The pregnant woman or the couple is too much fixed on their personal life-goals.
- 4) The personal environment of pregnant women.
- 5) The ignorance of the consequences which will follow when the pregnant woman will accept an abortion.

1.) As you know I am promoting *Prenatal Education* and *Spiritual Electroplating* as the two means to create *A BETTER WORLD* worth living in! What does it mean?

It means that if you want to participate in this transformation process you have to become conscious of everything you do and that includes also, not only, your point of view about sexuality and your sexual life. You learn to understand that the sexual union between man and woman is a creative act, like building a house, starting a company or anything else you do in your life, ... and should be done therefore in the most conscious and sacred way. (You should be even prepared for that!) You influence with your state of mind the conception and through that your personal future positively ... and the future of the soul you invite to incarnate on earth as your child! [You find a clear and profound explanation in the book *Life, Health & Peace*) under Chapter II – *Introduction*, Chapter X – *Prenatal Education*]

That indicates that the behavior with which modern man performs this act represents in general only his animalistic nature and fails to create an environment which expresses his divine destiny, divine heritage and divine nature. Therefore it helps only to create the reflection of poverty and misery in which man is laughed in and therefore unable to increase his personal life-conditions and that of society as well as that of the earth. As long as that age-old wisdom will be ignored as long you have to accept wars, crimes and suffering on the planet.

The ignorance of these laws is the first reason for the increasing numbers of abortions. Men and women see in the sexual act only a mean of pleasure and the result become rejected like the packaging of a product!

Sexual chastity until marriage and sexual modesty within could therefore be the key for personal happiness and a step to create a *HEAVEN ON EARTH* as long-term vision.

2.) What does it mean to get children?

At first it means a life-change: A change into a new direction, a direction which was planned or not. It means a change of values and of points of view. It means also to discover the world anew and to look at things with 'new' eyes. It means being confronted with a responsibility in which you are allowed to grow, to do failures (no-one is perfect!) and where you can prove that you learned from errors others did (your parent par example). You start a new life with new conditions even if your environment remains the same.

CHRISTOPHER BENJAMIN – *THE REASONS FOR ABORTION*

Children are a gift, a gift given from Heaven to intense, to value and to deepen your life. They are a key to become fulfilled, satisfied and happy. They help you to come out of sorrows, to change your 'head', when you need a change. They give you a rest, when you come home from work. They let you enter into another world and let you leave the world you were in the whole day! They give you a new value: they love you however you are, however you look like, despite your weaknesses and strengths, your limitations and values, if you are poor or rich. They love you without limitations! No-one loves you like them ... only God!

They are the incarnated love of God and are coming from Heaven! It depends only on you if you have problems with them or not! They, they are as innocent as angels and the reflection of your behaviors, opinions and actions. If you take care that your children are happy and enlightening as a sun, then you become happy and enlightening as a sun ... and therefore a blessing for your whole environment. Children help you to reconnect with your inner source, your inner guide, your inner knowledge and strength ... and to become yourself. You become natural, loving and wonderful like children. Didn't Jesus say: *'Unless you become like children, you will never enter the Kingdom of Heaven'*? They are alive, honest and fair. They believe in the best within you, of everyone. They are clear and straight! A real sun in the darkness!

They trust you as you have to trust your heavenly parents. You have to learn to believe that your heavenly parents only want you the best as you want for your children! They prepare you the conditions you need to become happy (your soul and not your stomach!) as you want it for your children. You find a perfect image to grow spiritually and to find reinforcement in your faith, your faith in Heaven and in life! Children are indeed a blessing!

It is not only responsibility – it is also pleasure what children bring. But a lot of people have to learn to behave properly with them. But when they succeed they taste the true joys of life ... a joy they don't want to miss for the rest of their life!

Parents or pregnant women who accept an abortion reject therefore the greatest gift Heaven and life gives them, with what they become valued. Ignorance is one explanation, the lack of faith in their heavenly parents and in their future the other for this phenomenon of increasing numbers of abortions!

To accept having children means therefore also to accept creating *HEAVEN ON EARTH* in your personal surrounding and on earth as a long-term vision!

3.) What does it mean to be fixed on your personal life-goals?

- Do you believe that you know everything life is able to offer you?
- Do you believe that you are able to prepare yourself the perfect conditions to become happy and fulfilled?
- Do you believe that you are the master of your destiny?
- Do you know how to become happy?
- Do you know your destiny, your personal mission on earth?
- Do you know what your name, your horoscope, your date of birth and time, etc reveals? What they say about yourself and your entire life on earth?
- Do you know what you want?
- What do you know about yourself?

Do you know why I ask you all of these questions? (This should be the easiest question of all the others!)

The answer is quite simple: you don't know what the best is for you, what is right and what is wrong and you have to learn to trust Heaven and the divine world what they have prepared for you!

You have to change plans? How often do you have to change plans in your private and business life? How often do you have to change schedules because, par example, of a traffic-jam, an

CHRISTOPHER BENJAMIN – *THE REASONS FOR ABORTION*

emergency situation or the canceling of an appointment? How often do you have to work longer because of difficulties which were not foreseen?

Your life is full of changes and uncertainties ... and you use this as a reason for not accepting a gift, a gift from Heaven??? You want to impose your will, your idea towards Heaven? You want to insist and cry as long as necessary until they subject? You are joking!

How much control do you have over your entire life? How much do others have control over their life? What do you think?

Did you see the movie *The Titanic* which is the story of the biggest passenger ship on its way from Europe to New York, USA at the beginning of the last century? There you can see very clearly how quick situations can change ... and future plans too. The leading actress shows you how wonderful you become guided into a new life despite your personal efforts! She needed to quit her place in society to become happy, fulfilled and satisfied, to get the taste of life back! She was able to ... thank to this guy named Jan! And again ... when the ship was going to sink, she rejected two times to be saved! But she was foreseen to become saved ... so therefore she was saved after the third start-up!

Earth is a school where we have to learn to accept divine will and to reject evil! Where we have to learn to live according to established universal laws and to master our inferior, lower, animalistic nature and desires and to act as true sons and daughters, as true heirs of God!

That means studies in initiatic sciences, training and mastering yourself. That means also trying to understand how the universe is constructed, maintained and governed. How these laws influence your life, your entire being and how you can live in harmony with them, so that this instability becomes a blessing and a gift for you, the key to become happy, fulfilled and satisfied. When you understand that and you start appreciating these opportunities for personal growing you accept everything Heaven offers you in life with joy! Then there will never be the question if you should accept changes, moving or ... to procure abortion. You know that your heavenly parents know better than you what you need and fits better in your life-plans. You know that by disagreement (in this case abortion) you deprive yourself of great blessings.

So, to accept pregnancy despite different plans means to have trust in your divine parents and to believe that it is for your personal best!

4.) Your personal environment doesn't allow children!

Okay. This could be a reason, but if you have a look at point three, the one before, you will agree that everything has a very profound reason when things happen in life.

Remember: the only stability you have is the instability, what means changes! If the environment is bad now it could become sooner or later better and more recommendable than before. To reject pregnancy because of this argument is like playing games with Heaven ... and again: a sign of ignorance!

A friend told me lately that Heaven accompanies every soul during the time of pregnancy with beneficial help so that the parents could create better conditions for the new citizen on earth. Are you awake enough to see these offers and to use them?

There is another point about which I wrote in the Chapter XII: *Womenpolitic is Peacepolitic and Peacepolitic should be Womenpolitic* in the book *Life, Health & Peace*:

... Now you could say that I forgot the reality of the women's' situation all over the world. The life-situation pregnant women are in, probably when they are in a war area!

No, I didn't forget it! I am very conscious of that!

Contrary, I realized something very important: we talked already about the '**POWER OF THOUGHT AND IMAGINATION**' (have also a look into the book '**POWER OF THOUGHT**', Appendix). I know that in this case it will be very difficult for her to remain in a good mood, not to become depressed and hateful. But it is very important to understand the influence of the desire of the mother onto her unborn child: if she sees this suffering,

CHRISTOPHER BENJAMIN – *THE REASONS FOR ABORTION*

this cruelty, and stupidity, she and the others around her are in, and she decides not willing to have this experience again, herself, her child and all the others in the world, when she prays passionately for an exceptional being who will bring a luminous end, who will help to bring '**HEAVEN ON EARTH**' she will participate to stop this constant flow of crime and violence through her new incarnated soul and she will be among those who start bringing souls for good into the world. She will give birth to a being who will consecrate his life to work for joy and beauty, harmony and peace all over the world ... and for justice also towards women. ...

Do you really think that also this is a reason to deny pregnancy and to accept abortion? Ask yourself if there is a very deep, profound meaning behind that what happened with you. Should you and your child be part in creating a new world where love, peace and justice reign?

5.) The consequences of abortion

Yes, this is a subject you rarely hear about: The physical and psychical consequences after an executed abortion, and the time before.

This is a real pain to decide if this life which is growing within you should be destroyed or not; to allow him to grow until it is ready to live by itself and to allow yourself to take care for him or not. This is a pain, mental suffering and a moral issue! Can you imagine the compunction you have to live with ... and no-one is able to help you?

Didn't Jesus say '*You should not kill!*'? In *Eating Meat – Drinking Wine – Smoking* I wrote also about the deeper understanding of this commandment. How should a woman deal with that constant flow of self-upbraiding? She only can stop it by becoming less receptive, less feminine and less sympathetic, what means more hard and cold like ice and stone!

She deprives herself of important attitudes which signifies her as a woman, which belongs to her! A woman is not a man, and a man is not a woman. There is no replacement through the other sex possible.

And there exist also the risk of becoming sterile, unable to become pregnant and having your own babies later in life. Abortion is a real risk!

So, as soon as men and women accept and understand, and especially the men (even with the condoms and other means as preventive measure), that having sex in relationships is a huge responsibility towards the other, feminine partner as long do we find women in this situation of martyring themselves. A real solution will be indeed: Sexual chastity until marriage and sexual modesty within! It will avoid compunction and mental suffering! And ... it will help to create **HEAVEN ON EARTH** as a long-term vision ... in your personal environment as well as on the entire world!

Recommended books with short thoughts from the Universal Brotherhood of Light:

- A new Attitude for everyday Life
- Living a Successful Life
- Means to bring 'Heaven on Earth'; *Prenatal Education & Spiritual Electroplating* (F)
- Only Beauty can save the World
- Proper knowledge of Human and Divine Justice
- Purity as the Key to Self-Realisation
- Real Freedom (F)
- Suicide – Reasons & Consequences
- The Importance of having an High Ideal
- The Laws which govern the Universe
- The Power of Thought
- The Reasons behind Suffering
